

SL 100 Series Lock Direction For Use

This lock operates with **two groups of combination numbers**. One combination opens the **shackle** (factory setting on 0-0-0-0). The second combination opens the **sliding door** (factory setting on 3-3-3-3). If you wish to enter your own combination, follow the instructions below.

1. Set dials on opening combination (factory set on 0-0-0-0).
2. Use a small screwdriver to turn the change button located above the sliding door. *Turn the button **clockwise 90 degrees (1/4 turn)**.*
3. Select your new combination and turn the dials to the numbers of your new combination. **VERY IMPORTANT - RECORD YOUR COMBINATION & STORE IN A SAFE PLACE.**
4. Using a small screwdriver, return the change button to the original position by turning *counter-clockwise 90 degrees (1/4 turn)*.
5. The sliding door combination is automatically set when the new combination is set. Follow the chart below to find the new combination for the sliding door.

Shackle and Door opening number chart										
Shackle	0	1	2	3	4	5	6	7	8	9
Door	3	4	5	6	7	8	9	0	1	2

Example: Shackle combination 7724 - Makes the door combination 0057
